OVERVIEW

Cybersecurity professional with 3+ years of experience in IT operations and security, specializing in **Secure Access Service Edge (SASE) solution (Zscaler)**, **PKI (Certificate management)**, **Endpoint security**, **Email security**, and **Microsoft Purview(DLP solution)**. Proficient in **incident response**, data governance, implementing Zero Trust SASE Solutions and risk management.

EDUCATION

Master of Information Security & Privacy (MISP)

Graduation: 2025

University of Calgary

Alberta, Canada

Relevant Coursework: Applied Cryptography, Network Security, Ethical Hacking Laboratory, Governance and Risk Management, Private Data Management, Policies, Standards and Programs

Bachelor of Technology (BTech) in Computer Science & Engineering

Graduated: 2020

Indira Gandhi Institute of Technology (IGIT)

Sarang, India

WORK EXPERIENCE

Senior Security Analyst

October 2020 – July 2024

HCLTech (MSSP for Stanley Black & Decker, Mosaic & more)

Chennai, India

- Diagnosed and resolved connectivity and security tickets with **Zscaler (Zero-Trust SASE solution)** across 300+ devices and virtual machines.
- Collaborated with teams to resolve issues on the **Security Scorecard platform**, enhancing the **overall security posture by 20 points**.
- Configured and managed data loss prevention policies in Microsoft Purview to protect sensitive information across endpoints and cloud environments.
- Led the management of 100+ internal and external certificates, optimizing the organization's PKI infrastructure.
- Administered email security solutions using Proofpoint, Microsoft Threat Explorer, and Abnormal Security, enhancing threat detection.
- Managed, detected, and remediated security incidents across 200+ devices using XDR solutions such as Microsoft Defender XDR and Cortex XDR.

Summer Intern (Mobile App Developer)

June 2019 – August 2019

Hindustan Aeronautics Limited

Koraput, India

- Developed a cross-platform mobile application for food delivery using React Native, contributing to an increase of 30% in user engagement.

RELEVANT PROJECT

AWS Cloud Security Assessment for a Calgary based Startup

Aug 2024 – Nov 2024

Conducted a security assessment of AWS configurations using **ScoutSuite**, identifying misconfigurations and remediating security issues and verifying system stability.
